Spray to drip conversion kits <u>must</u> include: <ul style="list-style-type: none"> • ½" female to male conversion elbow • Backflow preventer (only required for raised beds and systems that do not already have a backflow preventer) • T filter • Pressure Regulator • Swivel hose (or similar) tubing adaptor

*Micro-sprays, micro-jets, soaker hoses, and bubblers do **NOT** qualify for a drip irrigation rebate.*

Qualifying Irrigation Weather Based Controllers and Timers

Weather based irrigation controllers and drip irrigation timers must be WaterSense® labeled. WaterSense® labeled products meet EPA water efficiency and performance criteria. Qualifying products can be searched for on the EPA website: <https://lookforwatersense.epa.gov/products/>

NOTE: Some controllers require additional components (such as rain sensors and Wi-Fi adaptor devices) in order to qualify as a WaterSense® labeled product.

Disclaimer of Endorsement: The City of Bozeman does not design, regulate or endorse irrigation or landscape products or companies. The irrigation equipment manufacturers listed are presented as a reference for irrigation product technologies that meet the City's rebate program specifications. Equipment from other manufacturers may also qualify. This list is provided as a service to customers and contractors, and is not intended to comprise a complete list of products meeting performance specifications. For more information, call 406-582-3220.
